# Protected WITH STAIN-PROOF™ BY DRY-TREAT PTY LTD

Hay St Mall, Perth

Eco-Concepts, Sydney - surfaces showroom

## UNIQUE PROPERTIES OF STAIN-PROOF™

- Protects against oil and water-based staining, damage and salt attack (e.g. efflorescence).
- 15 Year Performance Warranty can be issued, if sealer is applied by Dry-Treat Accredited Applicator.
- Protects against oil and water-based stains (from foodstuffs etc) and salt damage (e.g. efflorescence).
- Low cost and easy to maintain – does not require the use of special cleaners or cleaning methods.
- Slip resistance is hardly altered, as it is not a surface sealer, but works from within.

## HOW DRY-TREAT IMPREGNATING SEALERS WORK

- Hard, porous building materials (brick, concrete, natural stone, tiles, pavers) act like sponges, actually sucking liquids into the pores.
- Dry-Treat impregnating sealers deeply penetrate the material with special molecules which bond inside the pores. These molecules change the forces at work so liquids are repelled instead of being drawn into the material.
- Dry-Treat Pty Ltd is an Australian company leading the world in sealing technology.
